

Actuarial Opportunities at Milliman USA Denver Health Practice

Milliman USA is the country's most prestigious actuarial consulting firm with offices worldwide. Milliman is divided into four main practice areas – Health, Employee Benefits, Casualty and Life. All of our practices are owned by the local Principals who manage them. You can find out more about Milliman at www.milliman.com.

The Denver Health Practice of Milliman is a growing practice with a wide variety of niche practices. These specialties include Tricare (health care for military dependents and retirees), behavioral health, corporate benefits, health care in Latin America, provider and Medicare consulting, and consulting to HMOs among many others. Our work typically involves the analysis of the financial risks and projections associated with healthcare, as well as the management of healthcare. We are almost always looking for intelligent and energetic actuarial students.

The salary potential at Milliman is virtually unlimited, because people are paid based upon their contribution to the organization. We work with students closely to assist and support them in their attempts to pass actuarial exams. Students receive generous raises for passing exams. Students are also heavily involved as we stake out additional areas of expertise. Our goal in our expertise areas is to be recognized as one of the top consultants in our specialty.

If you are a student interested in pursuing a career in actuarial science, we have the following advice and opportunities for you:

Seniors and Graduate Students: Please send us your resume! We are looking for articulate students who have passed at least one exam (more if you have been attending an actuarial program) and who want a fast start to their career. It is best to send your resume about four to six months before graduation. It is also better to contact companies directly, in order to show your clear interest in that company, and to establish strong lines of communication.

Sophomores and Juniors: We typically hire several interns each year, and we pay exam fees for your upcoming exams. Please send us your resume three or four months before you are available.

All Students: The time to start taking actuarial exams is now! You should start by visiting the Society of Actuaries web site (www.soa.org) and understanding the exam process, topics and timing.
