

Math 220. Prof. Ahlgren. December 10, 2004. Final announcements.

- (1) The final exam is on Saturday, December 18 from 1:30 to 4:30 pm in the usual classroom. The exam will end promptly at 4:30 pm.
- (2) The conflict exam is on Friday, December 17 from 1:30 to 4:30 pm in Altgeld Hall, room 141.
- (3) My office hours during finals week are
Wednesday, December 15. 10 am- noon.
Thursday, December 16. 10 am-noon.
Friday, December 17. 10 am-noon.
Or by appointment (can also ask questions by email).
- (4) Please review my record of your grades and let me know **by Wednesday, December 15** if you find any inconsistencies with your own records. The letter grade on this sheet is your grade to date in the course.
- (5) The final exam is worth 30%. This can shift your grade by quite a bit.
- (6) To compute the effect which the final will have on your course grade, you can use the formula

$$.7 \times (\text{current average}) + .3 \times (\text{final exam score}) = \text{course grade.}$$

- (7) The final exam is cumulative.
- (8) There will be some short answer and/or true false questions which test your understanding of basic concepts and theory. (for example, you may be asked to explain what the Mean Value Theorem says, or what the Fundamental Theorem of Calculus says).
- (9) Suggestions for study: Study old exams. Study problems assigned for homework and group work. Study problems from chapter review. Study basic definitions. Study basic concepts and theorems. Study as much as possible; we have covered **a lot** of material this semester.
- (10) The goal of the final is to provide a **comprehensive** test of the **most important** material and concepts which we have studied this semester.
