

TABLE OF CONTENTS

CHAPTER 1 COUNTING

- 1.1 the multiplication rule
- 1.2 permutations and combinations
- 1.3 permutations and combinations continued
- 1.4 permutations of not-all-distinct objects
- 1.5 committees with repeated members
- 1.6 ors
- 1.7 at leasts
- 1.8 review problems
- 1.9 binomial and multinomial expansions
- 1.10 partitions
- review problems for Chapter 1

CHAPTER 2 GRAPHS

- 2.1 terminology
- 2.2 Euler cycles and Euler paths
- 2.3 spanning trees
- 2.4 planar graphs
- review problems for Chapter 2

CHAPTER 3 GRAPH ALGORITHMS

- 3.1 Warshall's algorithm
- 3.2 Prim's algorithm
- 3.3 Dijkstra's algorithm
- 3.4 running times (time complexity) of algorithms
- 3.5 network flows
- 3.6 the matching algorithm
- review problems for Chapter 3

CHAPTER 4 RECURRENCE RELATIONS

- 4.1 setting up recurrence relations to do counting problems
- 4.2 solving homogeneous recurrence relations
- 4.3 solving nonhomogeneous recurrence relations
- review problems for Chapter 4

CHAPTER 5 FINITE STATE MACHINES AND REGULAR SETS

- 5.1 FSMs with outputs
- 5.2 FSMs with accepting states
- 5.3 nondeterministic FSMs
- 5.4 regular sets
- 5.5 Kleene's theorem part I
- 5.6 Kleene's theorem part II
- 5.7 some non-regular sets
- review problems for Chapter 5

CHAPTER 6 PROOFS BY INDUCTION AND RECURSION

- 6.1 proof by induction
- 6.2 proof by recursion

CHAPTER 7 RELATIONS

- 7.1 introduction
- 7.2 partial orderings
- 7.3 equivalence relations
