

Math 241 Homework for Spring 2008

With the exception of the final exam, the following dates and assignments are all tentative, but I will stick to them if I deem them reasonable, moving them if I deem them unreasonable. Note that this does not include due dates for literacy sheets.

Mathematica homeworks are due at midnight following 11:59pm of the date listed. There is a grace period, however. If you turn in an assignment before the grader begins grading, no points will be deducted from your grade, but grading may begin anytime after midnight of the due date.
