

Nathan M. Dunfield

Dept. of Math., MC-382 · UIUC · Urbana, IL 61801
nathan@dunfield.info · <http://dunfield.info>
office: (217) 244-3892 · home: (217) 408-0015

Area: Topology and geometry of 3-manifolds and related topics.

Personal: Born in Ann Arbor, Michigan in 1975. U.S. citizen.

Education:

University of Chicago: Ph.D. in Mathematics, 1999.

Advisors: Peter Shalen and Mel Rothenberg.

Oregon State University: B.S. in Mathematics, summa cum laude, 1994.

Employment:

University of Illinois at Urbana-Champaign: Associate Professor of Mathematics, 2007–present.

Caltech: Associate Professor of Mathematics, 2003–2007.

Harvard: Benjamin Peirce Assistant Professor of Mathematics, 1999–2003.

Awards and Grants:

Fellow of the American Mathematical Society (inducted 2013).

Currently sole PI on NSF grant DMS-1510204, \$387,000, 2015–2018.

Previously sole PI on NSF grants DMS-0707136 and DMS-1105476, and co-PI (with D. Calegari) on DMS-0405491; total of \$723,000 over 2004–2014.

Simons Fellowship in Mathematics, Fall 2013.

Alfred P. Sloan Fellow, 2004–2008.

Institute memberships (full semester): IAS (Fall 2015), ICERM (Fall 2013).

Associate of the Center for Advanced Study (Fall 2017).

LAS Dean's Award for Excellence in Undergraduate Teaching, Univ. of Illinois, 2014.

Distinguished Teaching Award, Dept. of Mathematics, Univ. of Illinois, 2012.

Faculty Teaching Award from the Associated Students of Caltech, 2006.

NSF Mathematical Sciences Postdoctoral Fellow, 2000–2003.

Alfred P. Sloan Dissertation Fellow, 1998–1999.

NSF Graduate Fellow, 1995–1998.

Publications: Available on web page listed above, and at arXiv.org via the below clickable links.

(with N. Brown and G. Perry) Colorings of the Plane, Parts I, II, and III.

Geombinatorics **3** (1993), 24–31, **3** (1994), 64–74, **3** (1994), 110–114.

Examples of non-trivial roots of unity at ideal points of hyperbolic 3-manifolds.

Topology **38** (1999), 457–465. [arXiv:math/9801064](#)

Cyclic surgery, degrees of maps of character curves, and volume rigidity of hyperbolic manifolds.

Talks:

Special Lectures:

The Dan E. Christie Mathematics Public Lecture at Bowdoin College, 2007.

Invited address: AMS Sectional meeting in Raleigh, NC, 2009.

Undergraduate Mathematics Symposium, UIC, October 2012.

33rd Annual Geometric Topology Workshop (principal speaker), Colorado Springs, June 2016.

Conferences:

Georgia Topology Conference, University of Georgia, August 1998.

Workshop on Computation in Low-dimensional Topology, Oklahoma State, March 1999.

Symposium on Computation in Group Theory and Geometry, University of Warwick, July 1999.

Weekend Topology Conference, UC Berkeley, April 2000.

3-manifolds workshop, Barnard College, November 2000.

Georgia Topology Conference, University of Georgia, May 2001.

Workshop on groups and 3-manifolds, CRM, Montréal, June 2001.
Topology in and around dimension three, Banff Research Station, September 2003.
Trends in 3-manifolds, Université du Québec à Montréal, May 2004.
Cornell Topology Festival, May 2004.
Knots in Vancouver, University of British Columbia, July 2004.
Low-dimensional topology, University of Virginia, December 2004.
Geometry and Topology of 3-Manifolds, ICTP, Trieste, Italy, June 2005.
Foundations of Computational Mathematics, Santander, Spain, July 2005.
Pacific Northwest Geometry Seminar, Oregon State, November 2005.
3-manifold Topology in Honor of Peter Shalen's 60th Birthday, CRM, Montréal, June 2006.
IAS/Park City Mathematics Institute, June 2006.
Midwest Topology Conference, University of Illinois, October 2007.
Interactions of Geometry and Topology, Banff Workshop, March 2009.
Hamilton Geometry and Topology Workshop, Dublin, September 2009.
Computational Differential Geometry, Topology, and Dynamics, Fields Institute, Nov. 2009.
Bloomington Geometry Workshop, Indiana University, April 2010.
Virtual properties of 3-manifolds, Université du Québec à Montréal, April 2010.
Workshop on pseudo-Anosovs with small dilatation, UW Madison, April 2010.
Topology and Geometry in Dimension Three, Oklahoma State, June 2010.
Low-Dimensional Topology and Number Theory, Oberwolfach, August 2010.
Geometry, analysis, and surfaces, Autrans, France, March 2011.
ACM Symposium on Computational Geometry, INRIA, Paris, June 2011.
Geometry & Topology Down Under, Melbourne, July 2011.
3-Manifolds, Artin Groups, and Cubical Geometry, CUNY Graduate Center, August 2011.
Ordered Groups and Topology, Banff, February 2012.
Redbud Topology Conference, Oklahoma State, March 2012.
Torsion in the homology of arithmetic groups, Banff, July 2012.
GEAR Network Retreat, University of Illinois, August 2012.
Midwest Topology Seminar, Michigan State, October 2012.
Group Theory, Number Theory, and Topology Day, Madison, January 2013.
Mapping Class Groups and Categorification, Banff, April 2013.
The Topology of 3-dimensional Manifolds, CRM, Montréal, May 2013.
Cube Complexes and 3-manifolds, UIC, May 2013.
Geometric Topology in New York, Columbia, August 2013.
Topology, Geometry and Group Theory, Informed by Experiment, ICERM, October 2013.
Computational & Algorithmic Topology, Sydney, March 2014.
What's Next? The mathematical legacy of Bill Thurston, Cornell, June 2014.
Combinatorial Link Homology Theories, Braids, and Contact Geometry, ICERM, August 2014.
Low-Dimensional Topology and Number Theory, Oberwolfach, August 2014.
Random Spaces, AMS meeting special session, Eau Claire, September 2014.
Texas Geometry and Topology Conference, Austin, November 2014.

Tech Topology Conference, Georgia Tech, December 2014.
 Computability, Analysis, and Geometry, Banff, March 2015.
 Representations of 3-manifold groups, geometric structures and exact computations,
 Institut de Mathématiques de Jussieu, June 2015.
 Symposium on Geometry and Topology of Manifolds, PIMS, Vancouver, July 2015.
 Workshop on 3-manifolds, Warwick, July 2015.
 New developments in TQFT, QGM, Aarhus University, July 2015.
 Computational Geometric and Algebraic Topology, Oberwolfach, October 2015.
 Geometry of groups, surfaces and 3-manifolds, AMS special session, Rutgers, November 2015.
 Workshop on Flows, Foliations and Contact Structures, IAS, December 2015.
 Interactions of Gauge Theory with Contact and Symplectic Topology in Dimensions 3 and 4,
 Banff, March 2016.
 Graduate Student Topology and Geometry Conference, Indiana University, April 2016.
 Sage Days 74: Differential geometry and topology, Observatoire de Paris, May 2016.
 Geometric Group Theory and Low-Dimensional Topology: Recent Connections and Advances,
 ICTP, Trieste, Italy, June 2016.
 33rd Annual Geometric Topology Workshop (principal speaker), Colorado Springs, June 2016.
 3-manifold workshop, Newton Institute, Cambridge, January 2017.
 Shanks Conference on Low-dimensional Topology and Geometry, Vanderbilt, May 2017.
 CURVE-2017, University of Maryland, August 2017.
 Introduction to geometry, dynamics, and moduli in low dimensions, Warwick, September 2017.
 Geometric topology in low dimensions, Warwick, September 2017.

Seminar Talks:

1999: Bay Area Topology Seminar (UC Davis), SUNY Stony Brook, SUNY Buffalo, Brown.
 2000: Univ. of Michigan, Université du Québec à Montréal, SUNY Albany.
 2001: Boston College, SUNY Buffalo.
 2002: Univ. of Texas, Yale, Bay Area Topology Seminar (UC Davis), Caltech, Columbia.
 2003: Stanford, Cornell, UC Santa Barbara, Univ. of British Columbia, Maryland, Univ. of Utah.
 2004: UC Berkeley.
 2005: Princeton, Columbia, Univ. of Southern California, UC Davis.
 2006: UC Berkeley, UW Madison.
 2007: Michigan State, UC Santa Barbara.
 2008: Indiana University, UIC.
 2009: Northwestern.
 2011: UC Santa Barbara, Temple, Columbia, Brown, Harvard, Northwestern.
 2012: UCLA, Stanford, Berkeley, LA Topology Seminar (at USC), Harvard, Chicago.
 2013: UC Santa Barbara, UIC, Ohio State, Brown.
 2014: Melbourne.
 2015: Chicago, Stanford, UC Davis, Yale, CUNY, Princeton.
 2016: UIC, Duke.
 2017: Cambridge, MIT, Brandeis, Boston College.

Departmental Colloquia:

- 2000: SUNY Albany.
- 2002: Caltech, Georgia Tech.
- 2003: UIC, Univ. of Utah, UC Davis, Univ. of British Columbia, Univ. of Toronto.
- 2005: Columbia, UIUC, Oregon State.
- 2006: UW Madison, UC San Diego, Northeastern.
- 2007: UCLA, Michigan State, UIUC, UC Santa Cruz, Univ. of Oregon, Brown, Bowdoin.
- 2008: Indiana University.
- 2011: UIC, Temple, Tufts.
- 2013: Dartmouth.
- 2014: Melbourne.
- 2015: Columbia, IAS.
- 2016: Univ. of Oregon, UC Irvine.
- 2017: Northwestern, Penn State, Univ. of Pittsburgh, Tufts, Washington University.

Software:

(with Marc Culler, Matthias Goerner, and Jeffery Weeks) *SnapPy*, a program for studying the topology and geometry of 3-manifolds. 2009–present. <http://snappy.computop.org>

Teaching:

I have a broad range of teaching experience, having taught more than 20 distinct courses ranging from a vector calculus class with 270 students to an advanced graduate topics class with only 5 students. My courses have been consistently well-received; for instance, I won a Faculty Teaching Award from the Associated Students of Caltech in 2006, a LAS Dean's Award for Excellence in Undergraduate Teaching in 2014, and was on the *List of Teachers Rated as Excellent* at Illinois 11 times, including for a 200 person calculus class in fall 2012.

Calculus: At Illinois, I have taught seven large vector calculus classes with between 170 and 270 students, with a total enrollment of more than 1,650. For this course, I developed active-learning worksheets for the discussion sections that are closely coupled to the lecture content; these worksheets have been adopted by many other instructors here, and so have been used by more than 10,000 students over the past six years. At Caltech, I twice taught a 120–student vector calculus class aimed at science and engineering majors.

Advanced undergraduate classes: I have taught classes aimed at students concentrating in math and related fields in a number of areas: elementary number theory, linear algebra, abstract algebra, probability, topology, and differential geometry.

Graduate classes: I have taught first-year graduate classes both in my core area of topology and also in algebraic number theory. I have twice given a one-term introduction to Riemannian geometry. I have also given four graduate topics classes.

Mentoring: I have graduated four PhD students:

- Vaibhav Gadre (2010) was a BP at Harvard, and is now a lecturer at Glasgow.
- Jonah Sinick (2011) works in industry as a data scientist.

BoGwang Jeon (2013) is a Rita Assistant Professor at Columbia, and will soon be an assistant professor at POSTECH in Pohang, South Korea.

Brian Benson (2014) is a visiting assistant professor at Kansas State.

I am currently the PhD advisor for three graduate students. I have mentored numerous undergraduates in research projects and honors theses.

Service:

Selected Departmental Committees:

Executive committee (2009–2011 and 2014–2016).

Undergraduate affairs committee (2011–2013, chair for 2012–2013).

Chair of colloquium committee (2008–9).

Chair of mathematics graduate admissions (Caltech, 2005–2007).

Off-campus Committees:

AMS Council, Member at Large, 2017–2021.

AMS Central Section Program Committee, 2013–15; chair for 2014–15.

IMA SageMath Scientific Board, 2016–2018.

Organizer for:

Lead organizer for the Fall 2013 semester program *Geometry, Topology, and Dynamics* at the Institute for Computational and Experimental Research in Mathematics at Brown.

Computation in geometric topology, Warwick, Decemeber 2017.

Workshop on Geometric Structures on 3-Manifolds, IAS, October 2015.

Conference in honor of Daryl Cooper's 60th birthday, Berkeley, May 2015.

Geometry, Groups, and Dynamics Day, Rose-Hulman, February 2014 and September 2016.

Special session at the Raleigh AMS meeting in April 2009.

Conference in Honor of Peter Shalen's 60th Birthday, CRM, Montréal. June 2006.

$N + 2$ nd Southern California Topology Conference. April 2005.

Editorial boards:

New York Journal of Mathematics, 2013–present.
