

Math 220 GE1 Final - Information

It currently seems that the final exam will have the following format (but it *may* change!):

1. A page of questions concerning limits (including finding limits from a graph)
2. A page of questions concerning integrals
3. A page of questions concerning derivatives
4. An optimization problem that combines bounding an integral
5. A related rates question
6. A Taylor series question
7. A Riemann Sum question
8. An implicit differentiation question
9. Checking whether something is a solution to a DE or an IVP
10. A series of questions involving the MVT, EVT, IVT, Rolle's Theorem, and the FTC
