

Charles W. Rezk

Curriculum Vitae

Work Address

Department of Mathematics
University of Illinois
1409 W. Green St.
Urbana, IL 61801
217 265 6309
fax: 217 333 9576

Home Address

1003 Centennial Dr.
Champaign, IL 61821

217 351 8142

e-mail: rezk@math.uiuc.edu

Education

University of Pennsylvania

1987—1991

B.A. in mathematics, *summa cum laude*, May 1991. Phi Beta Kappa.
M.A. in mathematics, May 1991.

Massachusetts Institute of Technology

1991—1996

Ph.D. in pure mathematics.
Date of graduation: May 1996.
Thesis title: “Spaces of Algebra Structures and Cohomology of Operads.”
Thesis advisor: Michael J. Hopkins.

Academic Positions

Northwestern University (Evanston, IL)

1996—2001

Ralph P. Boas Visiting Assistant Professor (9/1996–8/1999).
Instructor (9/1999–8/2001).

Institute for Advanced Study, (Princeton, NJ) *9/1999—3/2000 and 1/2001—3/2001*
Member. (On leave from Northwestern University, 9/99–3/00 and 1/00–3/00.)

Massachusetts Institute of Technology (Cambridge, MA)

1/2006–5/2006

Visiting teaching position. (Unpaid leave from UIUC.)

University of Illinois at Urbana-Champaign

2001—present

Assistant Professor of Mathematics.

Honors

Alfred P. Sloan Doctoral Dissertation Fellowship

1995—1996

AMS Centennial Fellowship

1999—2000

Charles W. Rezk

*Publications and Creative Works*¹

Doctoral Thesis. “Spaces of Algebra Structures and Cohomology of Operads.” (MIT, 1996)

Publications.

1. “Notes on the Hopkins-Miller theorem.” In *Homotopy Theory via Algebraic Geometry and Group Representations*, Contemporary Mathematics 220, Amer. Math. Soc., 1998, pp. 313-366.
2. * “Brown-Comenetz duality and the Adams spectral sequence,” with Mark Mahowald. In *American Journal of Mathematics* **121** (1999), pp. 1153–1177.
3. * “A model for the homotopy theory of homotopy theory.” *Trans. Am. Math. Soc.* **353** (2001), 973–1007.
4. * “Simplicial structures on model categories and functors,” with B. Shipley and S. Schwede. *Am. J. of Math.* **123** (2001), 551–575.
5. * “Every homotopy theory of simplicial algebras admits a proper model.” *Topology and its Applications*, **119** (2002), 65–94.
6. * “Topological resolutions of the $K(2)$ -local sphere,” with P. Goerss, H.-W. Henn, and M. Mahowald. *Annals of Mathematics*, **162** (2005), 777–822.
7. “The units of a ring spectrum and a logarithmic cohomology operation.” *Journal of the American Mathematical Society*, **19** (2006), 969–1014.
8. “Topological modular forms of level 3,” with M. Mahowald. Accepted for publication in *Pure and Applied Math. Quarterly*.
